

PROJECT NOTIFICATION

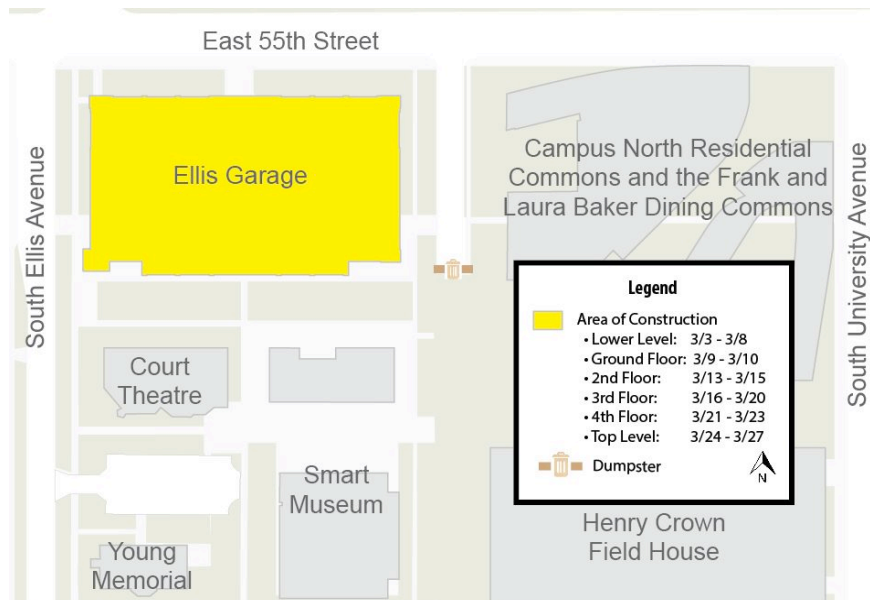

Date: February 22, 2017

Re: Ellis/Campus North Parking Structure-energy efficient lighting

On Friday, March 3, a project to install new LED lighting fixtures will start at the Ellis/Campus North parking structure. The new fixtures will provide more energy efficient lighting throughout the garage. Work will start at the lower level of the garage and complete at the upper level.

The campus community can expect the following:

- Access to garage levels will be maintained at all times for monthly and daily users and guests.
- Each work day, workers will cordon off parking spaces to ensure worker, driver and vehicle safety.
- A debris dumpster will be in place on Greenwood Avenue at the turnaround.
- Material deliveries and debris removal (for scrap and recycling) will occur at the site.
- Electricians will be on site each work day at 6 a.m. to 3 p.m.
- Completion is by Monday, April 3, dependent on weather and site conditions.

For additional information, please contact Robert Bandura, chief electrical engineer at 773.391.0418, or rbandura@uchicago.edu.
