

August 2022, Issue 1

View online version [here](#)**Register HK Event: Dinosaurs, Expeditions and More (Aug 18, 8:30pm HKT)**

Have you ever wondered what a palaeontologist would say about the latest Jurassic World movie? Or how extinct creatures like dinosaurs are studied? Are expeditions only about digging up bones in deserts or is there more to it than that? What can we learn from fossil discoveries about our human experience on earth, especially in light of climate change and the current rapid rate of species extinction?

The University of Chicago palaeontologist and National Geographic Society Explorer-in-Residence, **Professor Paul Sereno** will join our Yuen Campus Executive Director and host, Mark Barnekow, to talk about the study of fossils, Jurassic World (the movie), and his upcoming expedition to the Sahara Desert. Professor Sereno may even share his fascinating experience in China in the 1980s.

Don't miss this webinar to learn more about fossils and dinosaurs from UChicago's own Indiana Jones!

Listen to Professor Sereno on [The Course podcast](#) before you attend the event!
