

Smart View Training

THE UNIVERSITY OF
CHICAGO

March 2021

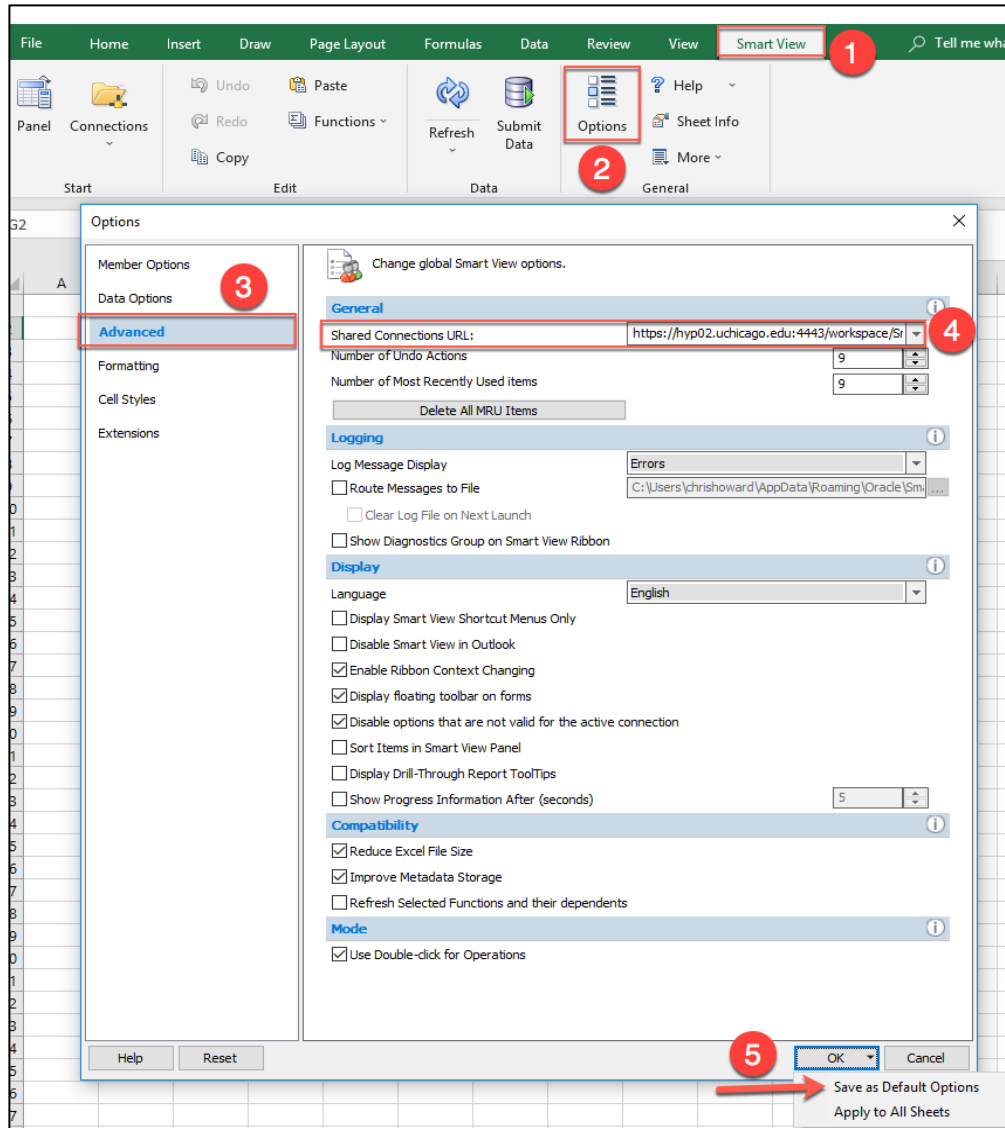

Agenda

- Smart View Overview
- Connecting to Smart View and Setting Preferences
- Accessing Web Forms and Data Entry
- Dimensional Overview
- Smart View Ad-Hoc Analysis
- Ad-Hoc Reporting Examples
- Questionnaire

Smart View – General Information

- Hyperion Smart View is a Microsoft Excel Add-In that allows end users to connect to Hyperion/Delphi from within Microsoft Excel
- Security will govern if a user can access Smart View, what the user can see and what the user can run
- Delphi username and password are the same for using Smart View
- The purpose of Ad-Hoc reporting is to equip end-users with the ability to query data, in a consistent format and create reports that can consistently and quickly be refreshed by each end-user

Smart View – Adding Connection URL

1. Select the Smart View tab
2. Select Options
3. Select Advanced
4. Copy <https://hyp02.uchicago.edu:4443/workspace/SmartViewProviders> into Shared Connections URL
5. Select the down arrow, to the right of 'Ok' and select 'Save as Default Options'

Smart View – Setting Preferences

Options

Member Options

Data Options

Advanced

Formatting

Cell Styles

Extensions

Change Smart View options related to grid rows and columns.

Suppress Rows

☐ No Data / Missing

☐ Zero

☐ No Access

☐ Invalid

☐ Underscore Characters

☐ Repeated Members

Suppress Columns

☐ No Data / Missing

☐ Zero (!)

☐ No Access (!)

Replacement

#NoData/Missing Label: #NumericZero

#NoAccess Label: #No Access

#Invalid/Meaningless: #Invalid

☒ Submit Zero

☐ Display Invalid Data

☒ Enable Essbase Format String

☐ Use Expense Type

Mode

Cell Display: Data

☐ Navigate Without Data

☐ Suppress Missing Blocks

Help Reset OK Cancel

1. Check the 'Submit Zero' box
2. Set the '#NoData / Missing Label' to #NumericZero
3. Make sure the 'Suppress Missing Blocks' is unchecked
4. Column and Row data suppression settings are controlled here in Data Options.
5. Click 'Save as Default Options'

Smart View – Setting Preferences

Data Options

Advanced

Formatting

Cell Styles

Extensions

Change grid formatting, styling and coloring options.

Formatting

☒ Use Thousands Separator

☒ Use Cell Styles

☐ Use Excel Formatting

☐ Move Formatting on Operations

☐ Retain Numeric Formatting

☒ Adjust Column Width and Row Height

Scale: Default

Preview:

Decimal Places: 2

Preview: 1.00

Form

☐ Repeat Member Labels

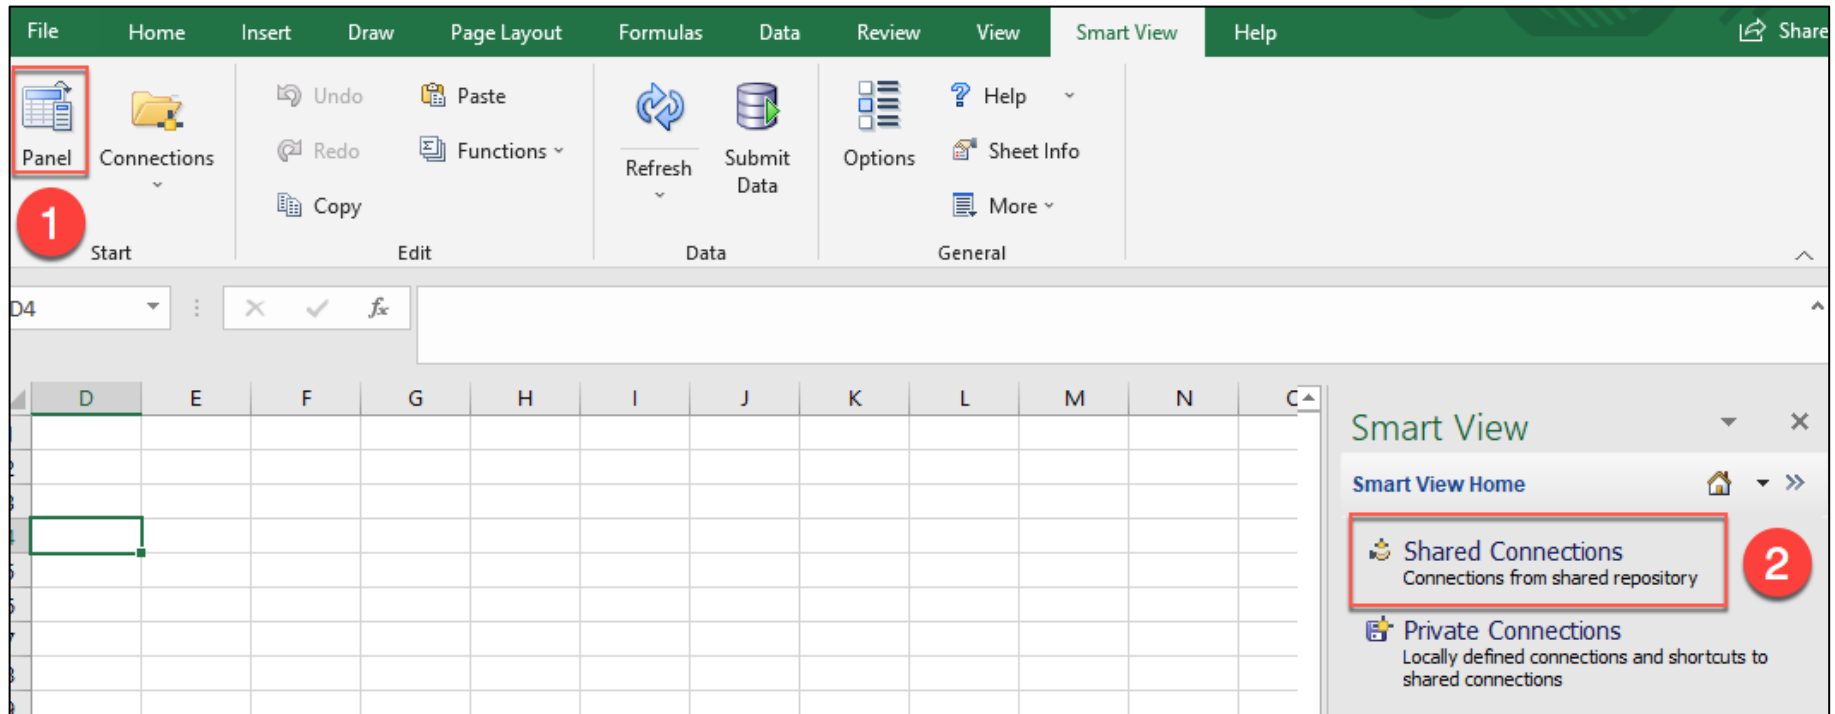

Help Reset OK Cancel

Save as Default Options

Apply to All Sheets

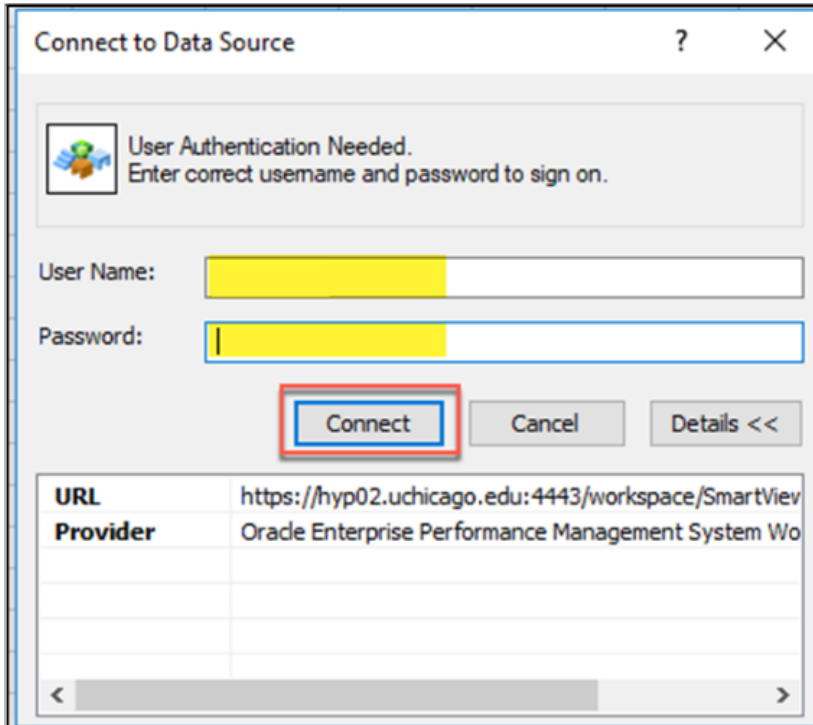

1. Check the 'Thousands Separator' box
2. Ensure 'Use Cell Styles' is selected
3. Set your preference for the number of decimal places that will display
4. Click 'Save as Default Options'

Smart View – Logging In

1. Select 'Panel'
2. Select 'Shared Connections'

Smart View – Logging In Cont.

Connect to Data Source

User Authentication Needed.
Enter correct username and password to sign on.

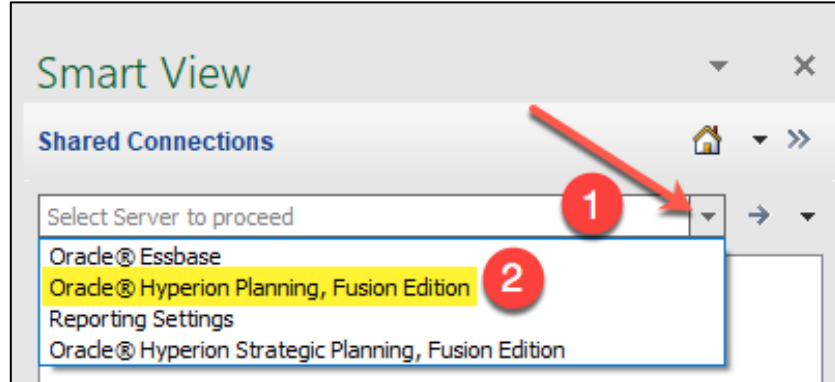

User Name:

Password:

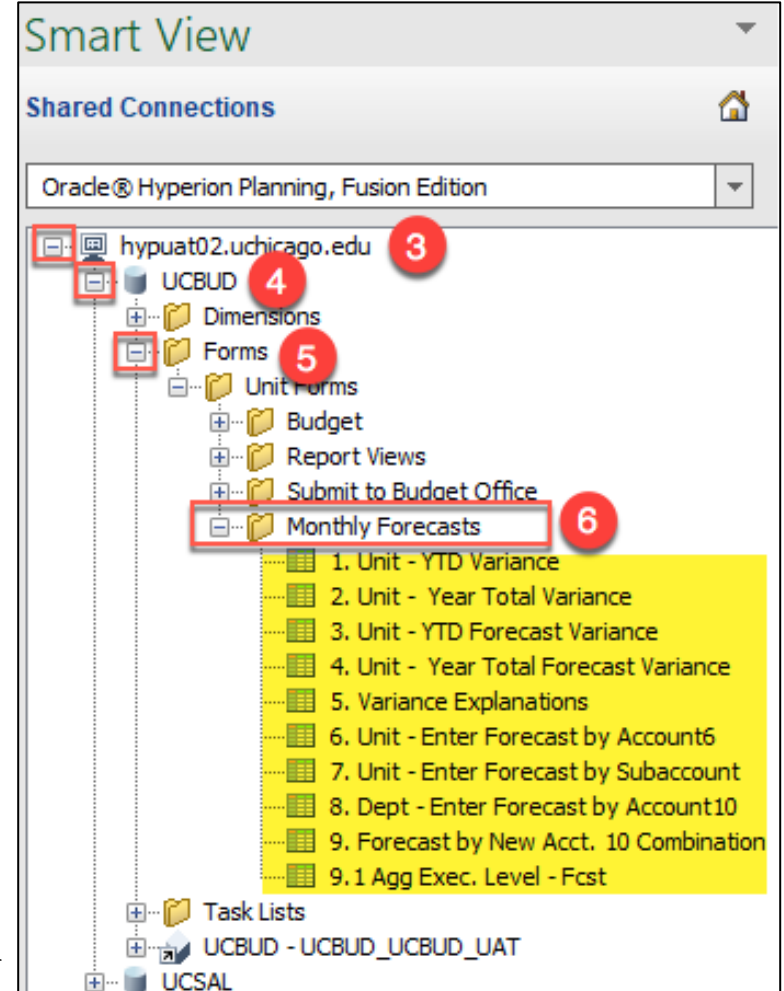

URL	https://hyp02.uchicago.edu:4443/workspace/SmartView
Provider	Oracle Enterprise Performance Management System Wo

1. Enter User Name and Password
2. Click 'Connect'

Smart View – Select Application

1. Select the down arrow
2. Click 'Oracle Hyperion Planning, Fusion Edition'
3. Click the + icon to the left of 'hyp02.uchicago.edu'
4. Click the + icon to the left of 'UCBUD'
5. Click the + icon to the left of 'Forms'
6. Click the + icon to the left of the form folder you wish to open
7. Double click on the name of the form you wish to open

Smart View – Web Forms & Data Entry

POV Formula Test 6. Unit - Enter Forecast by Account6 - hypuat02.uchicago.edu_UCBUD_1

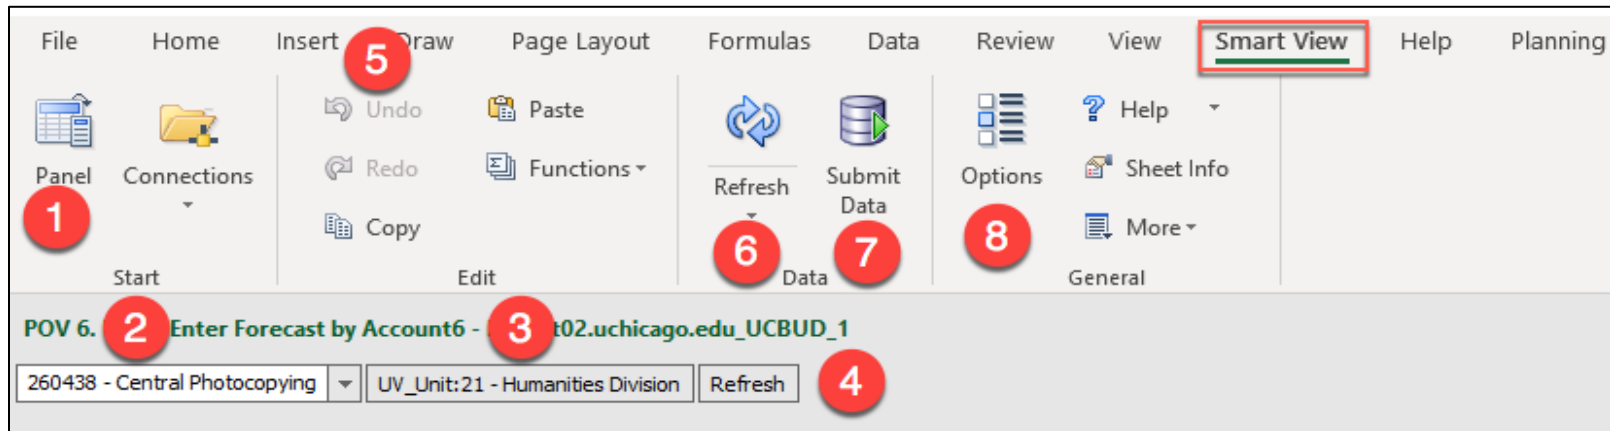

139

22	Total Sub Account	V99	447.80	16,046.91	3,583.47%	10,520.37	10,968.18	10,721.76	201.38	201.38	-115.25	-115.25	-115.25	145.06	145.06	145.06	-81.92	-81.92	-81.92

1. Point of View selection box, select the Account 6 member. Then click the 'Refresh' button to update the form
2. Yellow cells represent cells where data can be entered

Smart View – Web Forms & Data Entry Cont.

1. **Panel** – used to connect your spreadsheet to Smart View
2. **Point of View** – depending upon the form, user can change Account or Sub Account Member that the active form is pointing to
3. **Unit Variable** – display's your user variable for Unit (this is set in Delphi Workspace)
4. **Refresh** – when you have updated the Point of View, you must click refresh to update the form
5. **Undo/Redo** – these undo/redo buttons control Smart View activities (up to 9 actions back or forward) separate from traditional Excel undo/redo
6. **Refresh** – button can be used interchangeably with button #4, this button is used more during Ad-hoc analysis
7. **Submit Data** – when data has been entered onto an open web form, user must select submit data to enter it into the system. (Similar to Floppy Disk Icon in Delphi)
8. **Options** – Controls all Smart View settings

Smart View – Ad Hoc Analysis

- Ad-Hoc analysis allows end users the ability to slice and dice data that will to support data research and/or custom reporting needs
- All Ad-Hoc analysis is done in Microsoft Excel
- Ad-Hoc workbooks can be saved locally, reopened and refreshed by each end user (Ad-hoc workbooks do not need to be created from scratch)
- To conduct Ad-Hoc analysis in SmartView, end-users need to have an understanding of how data sits in UCBUD and UCSAL
- SmartView Ad-Hoc analysis is governed by the same end-user security that exists in Delphi
- Understanding the dimensionality of the UCBUD and UCSAL Applications will help users understand the power of Ad-Hoc analysis

Smart View – Dimensionality

What is a Dimension?

- Dimensions are structural elements of an application that describe and organize data (data about data)
- Delphi provides six (6) standard, system-defined dimensions
- Delphi also provides the ability to define custom dimensions
- For Example: “I look at my data by Period (Month), by Entity (Account6), and by Sub Account”

Smart View – Application Dimensionality

UCSAL

Standard Dimensions	
1	Scenario (Budget, Actual, Forecast)
2	Version (1 st Draft, Submission, Final)
3	Period (YearTotal, Q1, Jul, Aug, Sep, Q2, ...)
4	Year (FY20, FY21...)
5	Sub Account or Account Control (XXXX)
6	Entity – Account 6 (FAS_10, FAS_400, 123456_V01)

Additional Dimensions	
7	Measures (Benefits, Allocation Pay Amt.)
8	Job Title (6 digit code)
9	Positions (Academic Ops, WD_12, P9014567)
10	Employee (HR_10, HR_400, 12345678H)

UCBUD

Standard Dimensions	
1	Scenario (Budget, Actual, Forecast)
2	Version (1 st Draft, Submission, Final)
3	Period (YearTotal, Q1, Jul, Aug, Sep, Q2, ...)
4	Year (FY20, FY21...)
5	Sub Account or Account Control (XXXX)
6	Entity – Account 6 (FAS_10, FAS_400, 123456_V01)

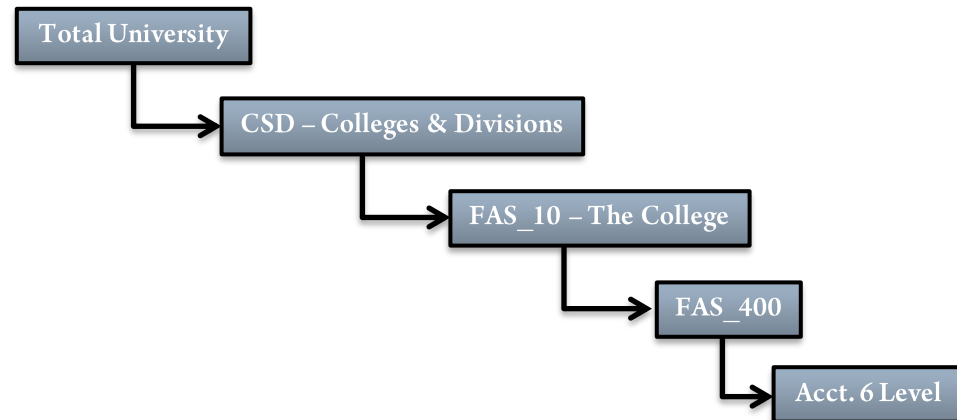

Additional Dimensions	
7	View (SBR row codes V99, P99, M40)

Smart View – Hierarchies

What is a Member?

- A member is an element or item in a dimension
- Member names must be unique across an application
- For Example: FAS_21, SL7100, Dec, Actual

Account 6

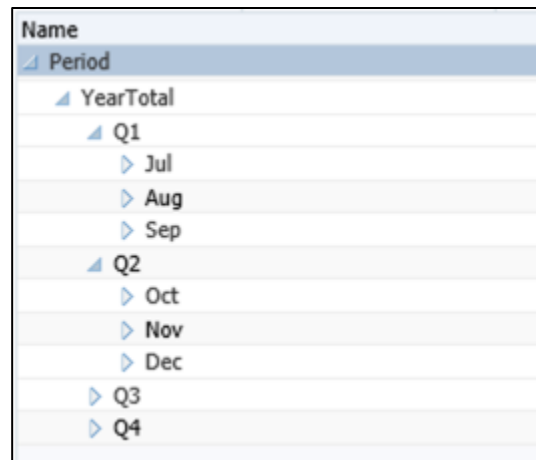

Period

Smart View – Hierarchy Terminology

- Parent – Members one level below a specified member
 - Q1, Q2, Q3, and Q4 are parent members – containing monthly detail
- Children – Members with parents above them
 - Jul, Aug and Sep are children of the parent Q1
- Siblings – Members of the same parent and on the same level
 - Jul, Aug and Sep are siblings
- Descendants – Members at any level below a parent
 - Q1, Jul, Aug, Sep, Q2, Q3, and Q4 are all descendants of [Year]

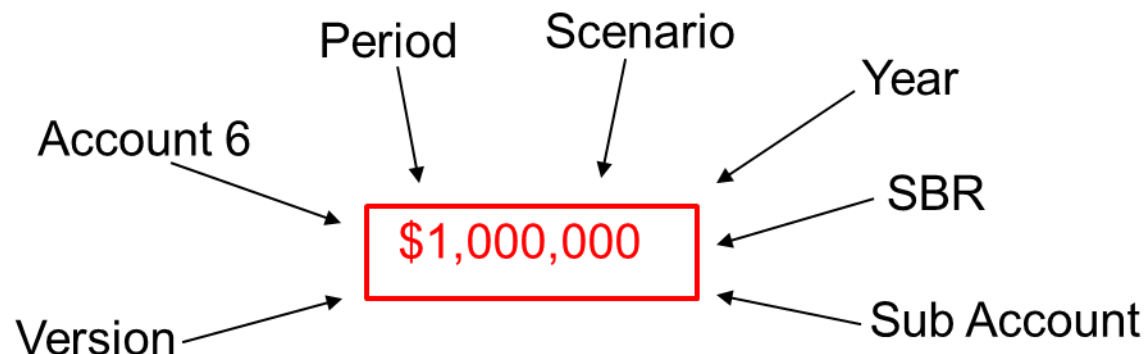

The screenshot displays a hierarchical tree structure within a software application. The root node is 'Name', which is expanded to show 'Period'. Under 'Period', there is a 'YearTotal' node, which is further expanded to show four quarterly nodes: 'Q1', 'Q2', 'Q3', and 'Q4'. Each quarterly node is expanded to show its constituent months: 'Q1' shows 'Jul', 'Aug', and 'Sep'; 'Q2' shows 'Oct', 'Nov', and 'Dec'; 'Q3' and 'Q4' are also expanded but their specific month details are not visible in the image.

Name
Period
YearTotal
Q1
Jul
Aug
Sep
Q2
Oct
Nov
Dec
Q3
Q4

Smart View – How to Find Data

- A multidimensional database approach enables multiple views of datasets, with any given data point being the intersection of the defined dimensions
- Example:
 - Any single piece of data resides at the intersection of all the dimensions in the given application
 - View data by any member within any dimension
 - Data is entered/loaded at the bottom level (level zero) of all dimensions

Metadata / Data Overview

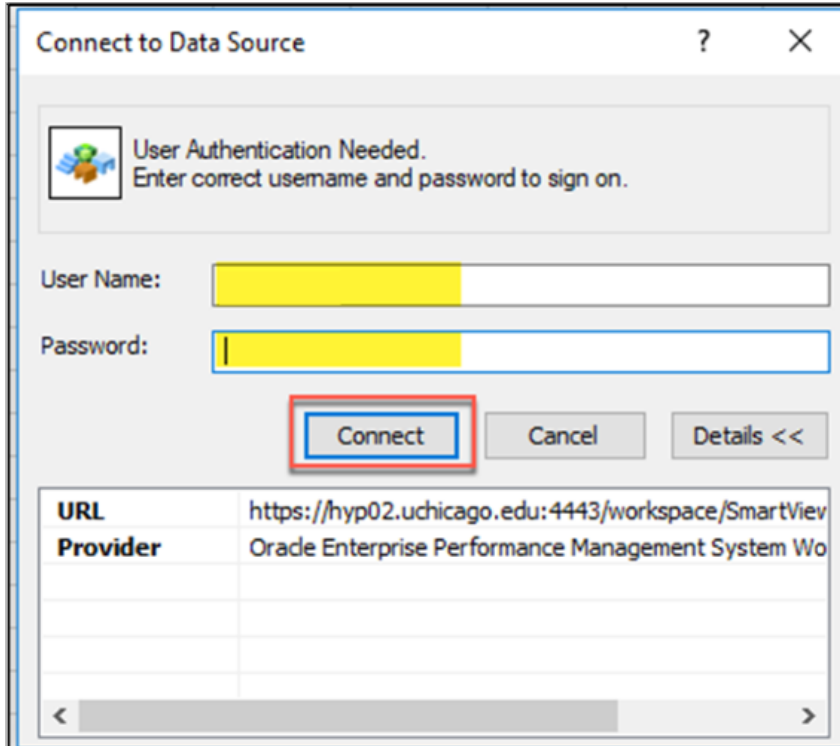

Smart View – Logging In

1. Select 'Panel'
2. Select 'Shared Connections'

Smart View – Logging In Cont.

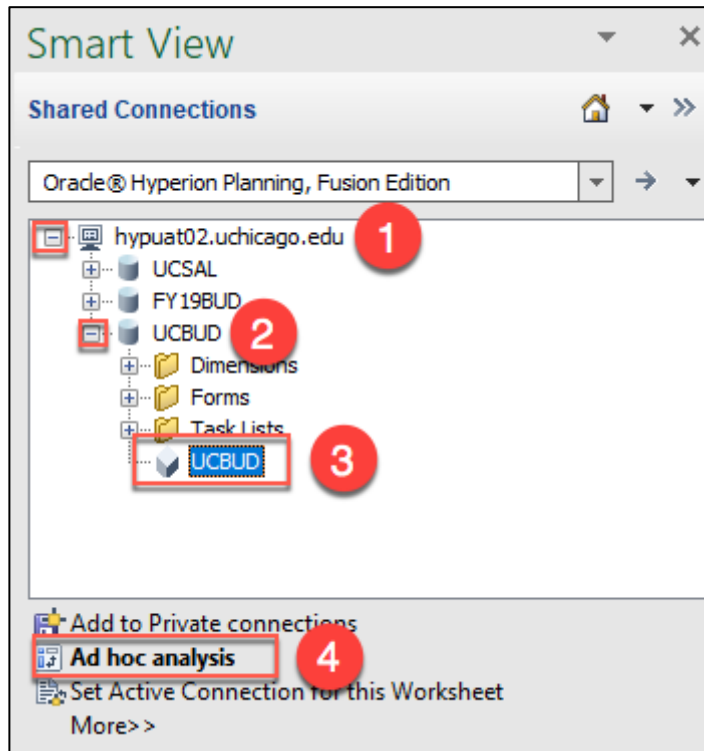

The image shows a 'Connect to Data Source' dialog box. At the top, it says 'User Authentication Needed. Enter correct username and password to sign on.' Below this are two input fields: 'User Name:' and 'Password:'. The 'Connect' button is highlighted with a red and blue border. At the bottom, there is a table with two rows: 'URL' and 'Provider'. The 'URL' row contains the text 'https://hyp02.uchicago.edu:4443/workspace/SmartView' and the 'Provider' row contains 'Oracle Enterprise Performance Management System Wo'.

URL	Provider
https://hyp02.uchicago.edu:4443/workspace/SmartView	Oracle Enterprise Performance Management System Wo

1. Enter User Name and Password
2. Click 'Connect'

Smart View – Ad Hoc Connection

1. Click the + icon to left of hyp02.uchicago.edu
2. Click the + icon to the left of application you want to run your Ad-Hoc analysis in (UCBUD or UCSAL)
3. Click the + icon to the left of the database you want to run your Ad-Hoc analysis in (UCBUD → UCBUD, UCSAL → UCSAL)
4. Click Ad-Hoc analysis

Smart View – Ad-Hoc Preferences

Options

Member Options

Data Options

Advanced

Formatting

Cell Styles

Extensions

Change Smart View options related to grid rows and columns.

Suppress Rows

☐ No Data / Missing

☐ Zero

☐ No Access

☐ Invalid

☐ Underscore Characters

☐ Repeated Members

Suppress Columns

☐ No Data / Missing

☐ Zero (!)

☐ No Access (!)

Replacement

#NoData/Missing Label: #NumericZero

#NoAccess Label: #No Access

#Invalid/Meaningless: #Invalid

☒ Submit Zero

☐ Display Invalid Data

☒ Enable Essbase Format String

☐ Use Expense Type

Mode

Cell Display: Data

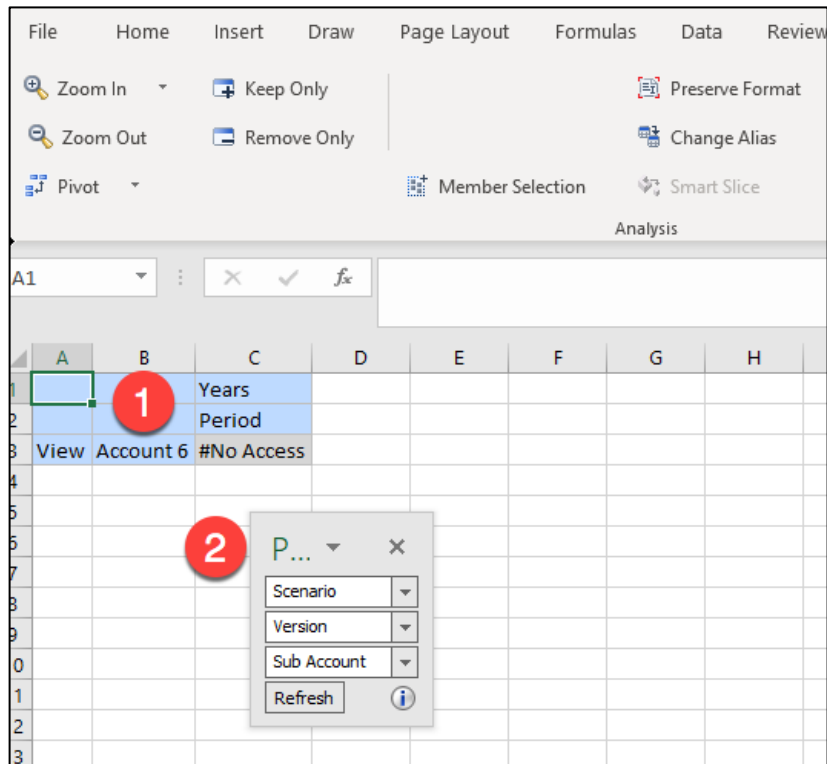

☐ Navigate Without Data

☐ Suppress Missing Blocks

Help Reset OK Cancel

1. Make sure the 'Suppress Missing Blocks' is unchecked
2. Column and Row data suppression settings should be turned off when starting Ad-Hoc analysis.
3. If any of the suppression are enabled, you will receive an error when attempting to create a new Ad-Hoc analysis

Smart View – Ad-Hoc Grid

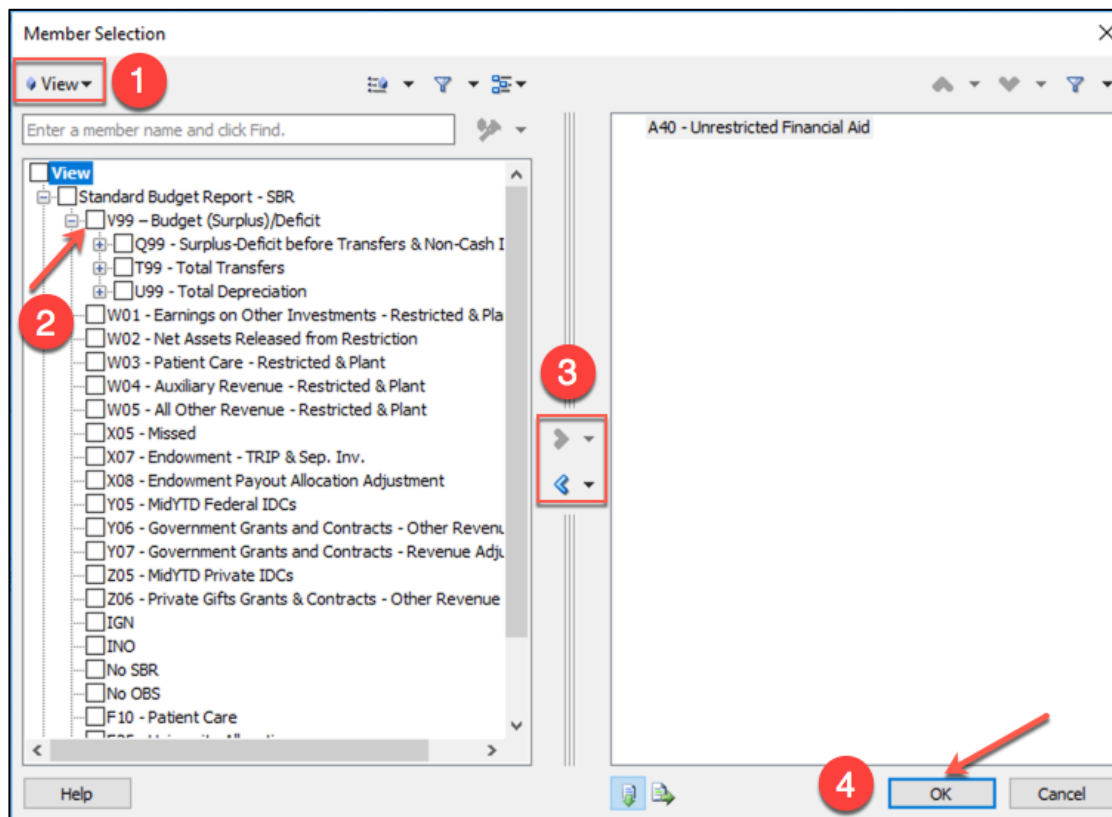

1. The default starting Ad-Hoc grid has the Years and Period dimensions in the Columns and the View and Account 6 dimensions in the rows.
2. The remaining application dimensions will be located in the POV box. These dimensions can be added to either the row, column or left in the POV box.

Smart View – Ad Hoc Buttons

- 1. Zoom In/Zoom Out** – use these buttons to drill down into a lower level of the hierarchy or drill out of the hierarchy
- 2. Pivot** – Move a dimension from the column to the row, row to the column or into the Point of View
- 3. Keep Only/Remove Only** – keep or remove the selected member from the selected dimension
- 4. Member Selection** – select a member from any dimension
- 5. Change Alias** – toggle between the member name/alias (SL7100/ 7100-Domestic Travel)
- 6. Refresh** – refresh the Ad-Hoc analysis, required when dimensions/members are moved or if data needs to be refreshed
- 7. Submit Data** – end users cannot submit data via Ad-Hoc

Smart View – Member Selection

1. Select Dimension – select the dimension you want to select a member from
2. Member – check the box of the member you wish to select
3. Finalize Selection – once member has been selected, click the blue arrow to finalize the selection
4. Member Selection – select a member from any dimension
5. Select Ok – select Ok to finalize the selection

Smart View – Ad Hoc (Budget Example)

	A	B	C	D
1				Scenario
2				Version
3				Year
4				Period
5	SBR	Account 6	Sub Account	
6				

1. Scenario = Budget
2. Version = 1st Draft/Submission/Final
3. Period = YearTotal
4. Year = Current Fiscal Year (FY19)
5. Account 6 = FAS_XX (Start with your unit or your dept)
6. Sub Account = Total Sub Account

Smart View – Ad Hoc (Forecast Example)

	A	B	C	D
1				Scenario
2				Version
3				Year
4				Period
5	SBR	Account 6	Sub Account	
6				

1. Scenario = Mar Forecast
2. Version = 1st Draft/Submission/Final
3. Period = YearTotal
4. Year = Current Fiscal Year (FY19)
5. Account 6 = FAS_XX (Start with your unit or your dept)
6. Sub Account = Total Sub Account

Sample Example – Budget vs Actual

	A	B	C	D
1			2020	2020
2			Total Sub Account	Total Sub Account
3			Final	Final
4			Budget	Actual
5			YearTotal	YearTotal
