ST04 – Building ID Wall-Mounted, 3 Line Message / Atypical Layout (B)

Typical Layout

Note: Single-faced. All signs to be oriented parallel to building unless otherwise specified.

Building Identification Placement Guidelines – Plaque placements should be based on sight lines, relationship to door and any architectural details of the façade.

1. Place plaque where previous sign was located to cover holes.
2. If there has not been a previous sign, place 65" to bottom on latch side of doorway.
3. If there is architectural interference place the plaque based on façade design.

Atypical Layout
ST05 – 6” Building Address Numbers on Glass Door or Transom

ST06 – Building ID on Glass

Typical Layout
Note: fabricator must field check glass and submit drawings to designer for approval
**ST07 - 6” Building Address Numbers - 6” Bronze/Anodized Aluminum Prismatic Letters**

**Typical Layout**
*Note: Letters are pin-mounted flush to wall. Follow drawing for typical letter spacing.*

**Number Identification Placement Guidelines**
Number placement should be based on sight lines, relationship to door and any architectural details of the façade.

1. Place numbers where previous numbers were located to cover holes.
2. If there has not been a previous sign, place a minimum of 10" below bottom edge of building identification sign.
3. If there is architectural interference, place the plaque based on façade design.

*Note:*
The University of Chicago must approve address numbers. Fabricator must submit drawings to client for approval.
