Ethical Issues with Advanced Biotechnology (Mar 16)

As medical and information technology advance, there are points in which substantial interaction occurs and therefore opportunities to investigate and discuss the ethical delivery of care in a rapidly changing environment. The changes in medical and information technology impact all disciplines of medicine: Surgery, Medicine, Palliative care, end of life care, and many others. Using an interactive case-based format, in collaboration with our surgical, medical, and bioethics colleagues in Hong Kong, the conference will cover specific topics which emphasize different approaches to these issues across Western and Chinese cultures.

Workshop on Linguistic Minorities in Asia (Mar 22-23)

be covered will include not only socio-political questions such as how minority languages are valued, by whom, and under what conditions, and how answers to the preceding questions influence how speakers utilize and react to minority languages, but also linguistic investigations of the minority languages, covering all aspects of their grammars.

This workshop will discuss specifically issues concerning linguistic minorities in Asia. Topics to

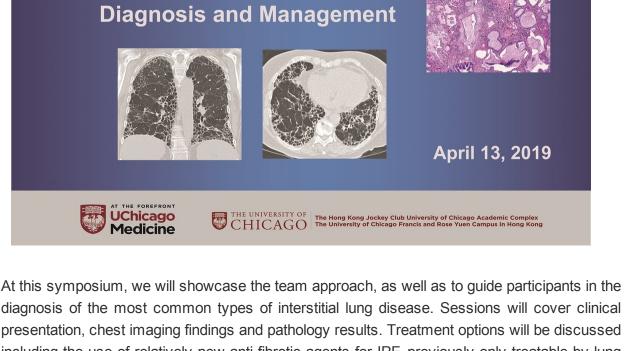

On Board Conference on NGO Board Service (Mar 28)

board governance for current board members, as well as staff at NGOs, and facilitates connections between potential board members and organizations looking to grow their boards. At the conference, you'll hear from business and NGO leaders, as well as Chicago Booth faculty. Speakers include John Wood, founder, Room to Read, and John Burrows, who teaches general management, leadership, and negotiations for Chicago Booth Executive Education. Sessions at On Board will focus on topics including maximizing board talent and fundraising for NGO boards. On Board is free to attend, but registration is required.

Interstitial Lung Disease: Diagnosis and Management (Apr13)

Interstitial Lung Disease:

including the use of relatively new anti-fibrotic agents for IPF, previously only treatable by lung transplantation. We will present our multidisciplinary conference in action for selected sample cases.
