

THE INSTITUTE FOR  
MOLECULAR  
ENGINEERING

# Seminar Series

**SPEAKER**

**Nicola Ferrier**

IME Fellow, Argonne National Lab

## **Image based methods for 3D structure: characterizing nanoscale materials**

Recovering 3D structure from images has been the focus of computer vision research for decades. This talk will look at the challenges involved in adapting image based methods for characterizing structure of materials.

**Thursday, June 12<sup>th</sup>**

**10:00 AM GCIS W301**
