IME DISTINGUISHED SPEAKERS IN TECHNOLOGY & INDUSTRY

DARLENE J.S. SOLOMON, PH.D.

Darlene Solomon is senior vice president and chief technology officer for Agilent Technologies. She leads Agilent Labs with a focus on life sciences and diagnostics, and she manages the company's university relations, corporate library and external venture investments.

A View into the "Century of Biology" and Agilent

**Senior Vice President and Chief
Technology Officer, Agilent Technologies**

Technology leadership based on a culture of innovation, contribution and sustained R&D investment has been at the core of Agilent's success through decades of market and technology waves. Today, biology is the field where science and understanding are most rapidly changing. This talk will highlight key megatrends in this 'century of biology', Agilent's transition from being a predominantly electronics and semiconductor company into one fully-focused on the life science and diagnostics industries, and some of the technology contributions underway at Agilent that will underlie tomorrow's breakthroughs.

OCTOBER 24 11:00 AM

**William Eckhardt Research Center
5640 S. Ellis Ave., Rm. 161**

For assistance, persons with disabilities may contact ime@uchicago.edu in advance of the event.
