About the Conference This is the seventh annual fellows' reunion conference on clinical medical ethics and patient care sponsored by the University of Chicago's MacLean Center for Clinical Medical Ethics. Once again, we are delighted that recent graduates of the Center's fellowship program will be presenting many of the papers. The aim of these conferences is to foster the development of a network of American and Canadian scholars and teachers who will apply clinical ethics to improve the quality of patient care.

In 1993, for the third consecutive year, Deans of American medical schools recognized the medical ethics program at the University of Chicago as the #1 medical school program in the United States. The MacLean conference highlights two distinctive aspects of the Chicago program—fellowship training and clinical ethics research. Together, these two probably account for the Center's national reputation.

Acknowledgements The conference organizers and participants thank Dorothy J. MacLean and her family for their encouragement and enthusiastic support of the Center and for their help in making this conference possible. The Center also gratefully acknowledges support from: The Pew Charitable Trusts, The Andrew W. Mellon Foundation, and The Field Foundation of Illinois.

The conference organizers and presenters wish to recognize Karen Rainey, Melanie Macielewicz, and J. Hughes for their invaluable assistance, and to extend a special thanks to Professor Carol Stocking, the Director of Research at the Center. Professor Stocking has supervised most of the Fellows' research projects and has been a major force in establishing the Center's research programs.

CME Credit The University of Chicago School of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to sponsor continuing education for physicians and certifies that this activity meets the criteria for 11 hours of Category 1 credit of the Physician's Recognition Award of the AMA.

Attendance at both conferences is by invitation, or by special arrangement with John Lantos (jlantos@medicine.bsd.uchicago.edu, 312-702-9107)

Note Conference Locations: The Walker Percy conference will be held at the University of Chicago Hospital (5841 S. Maryland Avenue) in the Dora De Lee Auditorium (CLI-168). The most convenient parking for the Walker Percy conference would be in the Hospital's parking structure on Maryland Avenue between 58th and 59th Streets. The MacLean conference will be held at the new University of Chicago Biological Sciences Learning Center (room 115), located at 924 E. 57th St. in Hyde Park. The University is accessible from Lake Shore Drive. On weekends, parking is generally available on the streets. If necessary the hospital parking facility is also available.
