

FACULTY LECTURERS

ABOUT THE FELLOWSHIP

The MacLean for Clinical Medical Ethics at the University of Chicago is the oldest, largest, and most successful clinical ethics fellowship program in the world. Dr. Mark Siegler, the Founding Director of the MacLean Center, started the first clinical ethics fellowship in the nation in 1981. Since then, the MacLean Center has trained more than 350 fellows in a one year, part-time program. Many of the fellows have enjoyed distinguished academic careers and have served as directors of ethics programs in the United States, Canada, Europe, and China. Current and former MacLean Center fellows and faculty have published more than 150 books. While most fellows are physicians, we welcome applicants interested in medical ethics from any perspective, including philosophy, theology, nursing, law, and the social sciences. The MacLean Center, with more than 45 faculty members from many disciplines, provides an outstanding interdisciplinary setting for training in clinical medical ethics. The Center also offers specialized fellowships in surgical ethics and pediatric ethics. In the future, the Center will offer a new 2-year fellowship program leading to a Master's degree.

In 2013, the MacLean Center became the fourth program to receive the prestigious Cornerstone Award from the American Society of Bioethics and Humanities. This award is given for "outstanding contributions from an institution that has helped shape the direction of the fields of bioethics and/or medical humanities."

MacLean Center Fellows, Faculty and Board Members at the 25th Anniversary MacLean Conference
