## How Colleges Change

### Chapter 6: Leadership and Agency of Change

**Adrianna Kezar**

“Joining theory and practice, *How Colleges Change* unmask[s] problematic assumptions that university leaders and change agents typically possess, and provides research-based principles for approaching change. ...Kezar presents an overarching practical toolkit—a framework for analyzing change, as well as a set of theoretical perspectives to apply that framework in order to custom-design a change process, no matter the organizational challenge or context. *How Colleges Change* is a crucial resource for aspiring and practicing campus leaders, higher education practitioners, scholars, faculty, and staff who want to become agents of change in their own institutions.”

Adrianna Kezar is Co-Director of the Pullias Center for Higher Education and Professor of Higher Education at the University of Southern California, USA.

**All members of the physics community are invited to join us for small group discussions; just read the article before arriving! Hope to see you there!**
