

THE UNIVERSITY OF
CHICAGO

Department of Statistics Consulting Program

The Department of Statistics invites **faculty, staff, and students of the University** to participate in its consulting program. Consultation is provided by graduate students of the Department with guidance from faculty members. Assistance is available in the areas of applied probability, statistical design, choice and application of statistical models, statistical computation and simulation methods, analysis of data, and interpretation of results. Clients are encouraged to seek consultation at the design stage of their research.

There is no fee for participation in the program, but participants will generally be required to make available a machine-readable version of their data.

Participation will be limited to projects judged to provide the greatest potential benefits for both consultants and clients. In addition, as the number of quarterly requests for consultation generally exceeds the capacity of the program, potential clients are encouraged to make their participation requests early in the quarter. The program does not provide tutoring services, course work assistance, or emergency consulting.

Consultations are arranged by appointment. To make an appointment, fill in our online request form at

<https://www.stat.uchicago.edu/consulting/clients/request/>
