Medical Clearances for Test Patient4

Students must follow the instructions below in order meet the University's requirements. If you are not compliant with your immunization clearances, a registration hold will be placed on your your account and you will not be able to register for classes for the subsequent term.

When submitting immunization information for review, please make sure you do the following:

- 1. Required: Enter the dates of immunization for all immunizations.
- Required: Medical students must use and upload the Medical Student Immunization Form (PDF). Non-medical students may use and upload
 the Non-Medical Student Immunization Form (PDF) or upload a copy of your immunization record.

Please note:

- 1. It is not sufficient to simply upload your immunization record. Failure to enter immunization dates will result in non-compliance.
- UChicago Student Wellness partners with the State of Illinois I-CARE registry to obtain information on state required immunizations. Some
 immunization requirements for new students will automatically update in this portal if valid records are on file with the state registry. No
 further action is required for immunizations already designated as Compliant.

For students who may request a **medical or religious exemption**, exemption requests can be submitted in the Clearance Exemptions section below. Complete the exemption request process for each immunization listed in the Items required for clearance section. Full details on University immunization compliance and exemption policies are available at https://wellness.uchicago.edu/immunization.

The Authorization for Treatment and Notice of Privacy Practices are required for students upon your first visit to Student Wellness, and annually thereafter.

Please allow 14 business days for review of documentation; exemption requests may take longer.

Overall Clearance Status: (2) Not Satisfied

Look for items with a Status of "Not Compliant".

Items required for clearance:

Clearance			Status	Details
Authorization for Treatment	UPDATE	0	Not Compliant	Expired 07/01/2023 6
